Basic truths: smart alone, brilliant together [#CrossrefLDN](#) [@epentz](#) More here crossref.org/truths/

 7 MONTHS AGO

The number of content items is growing steadily year on year; early next year we expect to reach the milestone of 100M registered items of scholarly content. The largest content type is journals, with books as the fastest growing.

Èxeh
@jotschirr

majority of crossref members non-profit #crossrefldn 91M scholarly content items, among them 70% journal article metadata

7 MONTHS AGO

Geoffrey Bilder then discussed some new initiatives at Crossref with a particular focus on Organizational ID's, the gaps they address and the challenges they present.

R@ss Mounce
@rounce

Crossref, Datacite, ORCID and THOR have formed a working group to discuss how Org.Ids would work for unambiguous id of affils #CrossrefLDN

@laurajwilkinson

@gbilder : most likely use case is providing controlled vocabulary for org names (institution lookup) #CrossrefLDN

 7 MONTHS AGO

Ginny Hendricks introduced the Metadata 2020 initiative: a collaboration that advocates richer, connected, reusable, open metadata for all research outputs. Crossref's upcoming Participation Reports will help to bridge the gap between what the Crossref infrastructure enables and how it is actually used, enabling publishers to better know what metadata they are contributing to the community and how they could improve.

@jotschirr

"many members have no idea what metadata they deposit" 😞 #crossrefldn

 7 MONTHS AGO

Rachael Lammey talked us through the innovative ways in which people use Crossref metadata from funding tracking tools, bibliographic management software, and collaborative citation tools, to manuscript tracking systems and specialist subject databases. The global reach of metadata is huge and the importance of depositing in-depth, accurate metadata cannot be understated and should be well communicated.

 7 MONTHS AGO

Jennifer Lin then talked us through the new product developments at Crossref including the introduction of a new content type to support peer reviews, and the Event Data service, providing a full, standardized record of external 'events'. You can now view the [live demo](#) of events flowing through Crossref Event Data.

I. New content type: Reviews

- Assets across peer review history for any and all review rounds: referee reports, decision letters, and author responses
- Pre & post publication
- Dedicated metadata
 - characterizes peer review asset: recommendation, type, license, contributor info, competing interests
 - makes the review process transparent: pre/post-publication, revision round, review date

JL: new content type: Reviews [#CrossrefLDN pic.twitter.com/OvhoWLwGMI](https://twitter.com/OvhoWLwGMI)

 7 MONTHS AGO

Ed Pentz rounded off the afternoon by discussing Crossref's future direction, including key strengths and future critical uncertainties. Strategic priorities were identified as the simplification of services, provenance tracking, enhancing quality control and greater implementation of Open Source across scholarly communication.

 **Laura J. Wilkinson**
@laurajwilkinson
